PROFILE

Product designer and design lead, 13+ years turning ambiguous, complex problems into clear systems and AI experiences people trust. I co-founded and lead design at Lindo.ai — an agentic, AI-native platform used by 30,000+ agencies to generate, manage, and grow 1,000,000+ client websites. I've trained AI to design with taste, built component systems that scale to millions of outputs, led a 12-person team, and shipped fintech and enterprise products used by tens of millions. I wireframe in code and prototype with AI tools.

EXPERIENCE

Co-Founder & Head of Design — Lindo.ai Jan 2023 – Present

Agentic AI-native website platform for agencies · Vancouver, BC

- **Scaled Lindo to 30,000+ agencies who have built 1,000,000+ client websites** — leading design across AI site generation, delivery, billing, and growth.
- **Cut agency delivery from days to minutes** by training the platform's AI to design with taste, so generated sites come out on-brand and client-ready.
- **Built a 1,000+ block-and-template system** that lets the AI compose complete, consistent websites at scale — the design foundation the whole product runs on.

Product Design Consultant — Lexpoint.io Jun 2025 – Apr 2026

- **Replaced \$500+ immigration consultations with instant, self-serve flows** — designing the AI eligibility assessments, calculators, and dashboards for a Canadian legal-tech platform (direct legal-tech experience).

Co-Founder & Designer — Lindo Card Jun 2021 – Jul 2022

- **Shipped a 0→1 Visa-backed benefits product from concept to launch** — replacing manual expense reports with one card across program setup, payroll/HRIS sync, and spend.

Product Design Consultant — ROOMVU Aug 2020 – Mar 2021

- **Raised usability for 350,000+ real-estate professionals** — built ROOMVU's first design system from scratch, rebuilt the dashboards on it, and lifted landing-page conversion.

Lead Product Designer — Asan Pardakht Apr 2019 – Feb 2021

- **Improved activation for an e-payments app used by 50M+ people** — redesigned core flows using behavioral data and usability research, shipping in agile with PM and product owners.

Product Design Manager — TiaraUXD May 2016 – Sep 2017

- **Led a 12-person design team shipping for clients reaching 30M+ users** across fintech, telecom, and media — owning craft standards, mentoring, and direction.

Lead UX/UI Designer — HyperOffice Jan 2012 – Apr 2016

- **Scaled an enterprise SaaS suite to 2M+ users across web, iOS, and Android** — led product design and built the design system behind it (Maryland, US).

Earlier: Product Design Consultant — Mofid Securities & Kian Digital (fintech / wealth-tech).

TOOLS & CRAFT

Design systems & component libraries · AI product and interaction design · end-to-end product design (research → UI) · prototyping & wireframing in code · front-end (HTML, CSS, Tailwind, JS) · Figma · Cursor · AI design tools
