ABOUT ME

Product designer and design lead — **13+ years** turning messy, high-stakes problems into clear systems and AI experiences people actually trust.

I co-founded **Lindo.ai** and trained its AI to design with taste; today **30,000+ agencies** build on it. Before that, I led design for products used by tens of millions and managed a 12-person team.

I think in systems, prototype in real code, and move fast with AI — but what I care about most is the person on the other side of the screen.
